Summarized Movie Description

Impossible Missions Force agents Ethan Hunt and Grace pursue Gabriel, once the Entity's main human proxy. Ethan and Grace escape with the aid of IMF agent Benji Dunn and recruit Paris, Gabriel's erstwhile lieutenant. They discover a device that Gabriel used to communicate with the Entity, which shows Ethan a vision of a coming nuclear apocalypse. The IMF team reunites in London, where Grace gives Ethan the drive housing the Entity, and the team members go their separate ways. Like Luther, Donloe preempts the explosion by setting off a detonator first, but buys enough time to get to safety beforehand. Ethan finds a second parachute, escapes with the Poison Pill, and plugs it into the module, allowing Grace to finish the download within a tenth of a second before all nuclear weapons are launched.
